# Canadian Mint Swamped Orders for 1965 P.L. Sets Closed

THE Canadian mint this week is busily digging itself out from under one of the most gigantic numismatic mailings of all time. Expecting that the new maximum of five proof like sets per order would allow receipt and acceptance to stretch over a period of some weeks, the Mint was amazed to find itself with orders for over two million sets before the new year even began.

Since the expected output of sets for 1965 is to be approximately 1,800,000, the Mint has been placed in a rather embarrassing position: word was given to many potential purchasers and to several publications that orders received before the first would be accepted. However, if these orders were accepted there would be no sets left for those who ordered at the proper time.

The Mint, therefore, made the following decision. All orders received before midnight the thirtyfirst of December are to be returned immediately.

Notwithstanding the propriety of this line of reasoning, there are probably a great number of purchasers who are, to say the least, rather distressed, over this necessity. In fact the Mint told PACE that it had received a tremendous number of long distance calls from points all over the Western hemisphere expressing unhappiness over the turn of events. These calls were prompted by the exceptional speed with which the Mint has begun the process of returning orders.

As of Wednesday the sixth, many purchasers in the southern part of the country had received their unopened orders. These were forwarded to the senders with a polite note of explanation. The Mint is using the return address on the envelopes for routing and only opens the orders when no return address is shown.

Forty Hour Cutoff With two million orders rejected, it might be imagined that the Mint would have its expected two weeks of acceptance before closing but such was not to be the case. As of Saturday afternoon, the second of January another two million orders were received and the cutoff became official and final.

Due to this cutoff, orders which were rejected due to early arrival may not be resubmitted, a fact of life which is not likely to make any of those "gun jumpers" any

happier.
They are not alone in their unhappiness, however. Since the Saturday cutoff, over two million more orders have been received and will, of course, have to be rejected. It is estimated that by the time the entire numismatic community becomes aware of the situation there will have been some ten million sets ordered.

In a discussion with Canadian Mint officials PACE was able to pick up little information other than the data contained in the official press release. The officials seemed a little stunned by the whole affair since only last year orders were accepted for several months and there was little volume at the first of the ordering period. They were at a loss to say just what was the cause of the tremendous increase though the best guess was the investment potential of the sets along with the non availability of the U.S. counterpart.

A few small tidbits of informa-

The Market Pace ..... 12

tion were gleaned and these were as follows:

Procedure for confirmation and mailing will be the same as last year. Successful purchasers will be informed by confirmation within sixty days of the fact that their sets are coming and the expected date of receipt date. Sets will be shipped insured mail.

Rejected orders will be returned immediately so as to tie up the funds of the purchasers as briefly as possible. This procedure will take precedence over the confirmation of accepted orders.

First mailout of the sets is not scheduled at the present time but probably will not be before February due to the volume of paper work involved.

An increase in the number of sets to be prepared is impossible due to several factors. The prime factor is the requirement of coin production for the Canadians to be used as a medium of exchange and must take precedence over collector demand. Secondly, the Mint is prepared to produce only a limited number of the sets and is unable to increase its productivity at this time.

Every attempt possible will be

Coins In The Spotlight ...... 14

made to screen out multiple orders when located. Before the first of January it was thought that the five set limitation plus the directive against multiple orders would be sufficient as a preventa-tive, but such has not been the case. The Mint has already uncovered many multiples and has taken the following stepts to curb such purchasing:

All orders from the same address will be checked and only if all names are of one family will the orders be accepted. The reason for this is the popular grid system of ordering in which several people combine names and addresses and order not only from their own addresses but from each other's also. While this method of screening will eliminate orders of coin clubs and the like from one address, it is regrettably

All orders coming in from one area or one post office will be screened. Many ordering groups have been careless in their mailing and even though they have no name-address duplicates, their orders were all mailed from one post office and will arrive in one bag. Such lack of foresight will probably cost them their expected gains.

As a penalty to attempted multiple orders, all of the group orders will be disallowed.

**Numismatic Demand Growing** While it is lamentable that the Canadian mint has been buried under a deluge of orders for their valued proof like sets, it is indeed a strange business that complains about too much business.

This year's proof like set production could have financed a considerable portion of the Canadian mint's budget if it could have been handled in a more business like fashion. While orders for ten millions of sets might well he higher than even experts in the field of numismatics would normally expect, certainly if the Mint had realized that many more sets would be ordered than could be produced. It would have been quite easy to raise the price on the sets to a level at which only the expected output would have been ordered. This price might have been anywhere from ten to

# Queen Victoria's Pennies, 1839-1901 Serial, Type or Variety Collecting? Opportunities Abound

By: Christian F. Verbeke UEEN Victoria copper from change? Till recently this was a reality; and in general, bargains still abound in this issue from reputable commercial numismatic sources.

For a coin collector to discover a large U. S. cent in change today is equivalent to expect shrimps to whistle — that one cannot fare any better in attempts to locate Flying Eagle cents, Indian Head cents, and even early Lincoln issues from circulation, is equally an understatement.

These facts are accounted for by successive demonetizations and coinage retirement schemes, vastly expanded coin collectors' interest, and the ever-decreasing size and monetized value of the United States one-cent denomination since inception. Indeed, the originally approved large U.S. cent of 264 grains of pure copper (1792) resulted in a watered down version of 168 grains by 1837, after successive weight reductions (208 grains in 1793; 186 grains in 1796). An abortive attempt to use a 72 grains nickel metal penny (Flying Eagle) in 1857 resulted in the abandonment of this ephemeral enterprise in favor of the 48 grain one-cent denomination, itself subjected to many vicissitudes of alloy changes-bronze, zinc, steel, and finally copper-zinc devoid of tin content by legislation of 1962. The latter period encompasses several design changes which culminated by the adoption in 1909 of the hitherto used Lincoln design.

While numismatically highly interesting, this diversity of United States one-cent designs, alloys and types has reached nightmarish proportions for an average coin collector, at a loss to complete penny series on a limited

budget.

The collector of British pennies of the equivalent period is blessed with an easier task; indeed Queen Victoria's copper coinage of virtually uniform characteristics, which extends from 1839 till her death in 1901, covers and overlaps the confusing and now exorbitantly priced United States penny issues.

The ultimate decision of selection is for the collector to make

and is most likely to be inspired by economy considerations. The desirability of one or the other type of collecting, i.e. United States cents vs. British pennies is entirely academic although the latter coinage is within greater reach of the average collector conditioned to a limited coin acquisition budget.

This writer has not escaped the wrath and ire of some, certainly well intentioned, American collectors whose main contentions were, some years back, that the idea of collecting British pennies was unthinkable on the grounds "they could not be found in change"—understatement indeed if applied to the American scene, not so however if considered from a British territorial viewpoint.

Moreover, the frailty of the argument is obvious in light of the exorbitant premiums com-manded by earlier United States one-cent denominations, equally absent from change, and often of burdensome total mintages - frequently many times the multiple of comparable Victorian coinage. To illustrate the case in point, as paradoxical as it may seem, an 1868 Indian cent lists for \$160 in uncirculated condition (mintage 10,266,500); its Victorian counterpart, an 1868 penny (mintage 1,-182,720) in bright fiery red uncirculated condition commands \$18. A deliberate example? No, an essentially random selection from amidst hundreds of other, equally dramatic examples to be encountered.

Till recent years, the fortunate British collector could assemble a rather large percentage of a Victorian penny collection strictly from change; the advent of date rather than type collecting in Britain changed matters rapidly.

A complete Victoria penny collection by date remains a bargain compared to its United States equivalent, in spite of a rather sustained price advance in British numismatic material. In the absence of a serial-collection, however, the coin collector may consider a type-collection of Victoria's pennies in uncirculated condition, with the long-term aim of including prior and subsequent rulers to date.

What exactly constitutes Victorian types in pennies has never been completely defined, it is generally felt, however, if a collector limits himself to a type-collection, it is to his best advantage to include major varieties even if they are not considered "types" proper. A common but crude classification of Victorian pennies by type would include the young head, copper issue (1839-1860); young head, bronze (1860-1895), and the veiled head, bronze (1895-1901). These basic classes can be greatly broadened, however, to cover the entire Victorian repertoire of designs, alloys and major varieties. The unusual Gothic style design and Jubilee Head of certain silver denominations were not used on minor Victorian copper coinage; this does in no way alter the considerable significance of the latter.

1st Issue, Copper, Young Head, 1838-1860

Designed and engraved by William Wyon under the July 5, 1838 proclamation authority. Weight averages 290 grains of pure copper and is similar to the George IV, 2nd issue. The coin was thus monetized at 24 pence per pound, conversely 24 copper pennies were struck from one pound of pure

copper

The entire issue is characterized by numerous altered dates resulting from overcut dies of the previous year, e.g. 1848, 8 over 6; 1854, 4 over 3, etc. The rare 1860 issue consists of two overcut figures, 60 over 59. The economyminded attitude at the London Mint to use recent dies resulted in outright confusion for the officially non-existant 1852 issue; it is believed that pennies were struck that year from unaltered 1851 dies.

Obverse design shows a Victoria young head, truncated above shoulder, of generous proportions. Design initials W.W. appear in incuse on the truncation from 1839 to 1858. The same design continued without the designers initials from 1858 to 1860.

Reverse design featured the figure of Britannia seated as on the William IV penny, REG (Regina) substituted for REX.

Also distinguishable the position of the colon (:) after DEF. Two major design occur, colon (:) close to F (F:) and colon (:) placed away from F (F-:). The issues of 1841 and 1843 occur with and without the colon (:) after REG. The different young head versions here described should normally be included in a comprehensive type-collection.

The 1839 bronzed proof issue deserve special mention although other dates are known in proof condition, struck in copper and silver; gilt proofs are considered fakes. Of rather academic interest is the variety known as "plain trident" for 1853 to 1857.

Selected Valuations:
1839 Proof: ......\$165.00
1841 REG (no colon):
Unc. ...... \$17.50

Reduced Size Bronze

2nd Issue Bronze Young Head, 1860 — 1895

Bronze coinage replaced copper in 1860, the move was an imitation of the French change-over in 1852 which had produced favorable results. The bronze composition was 95 per cent copper, 4 per cent tin, and 1 per cent zinc. To overcome the heavy demand for the new coinage, contracts were awarded to Messrs. Boulton and Watt and Messrs. Ralph Heaton and Sons. Weight was reduced exactly one half thus producing 48 pence per pound.

The new design, work of Leonard Charles Wyon, by the proclamation of December 17, 1860, showed Queen Victoria's draped bust, head coronated by a wreath of leaves with berries, on the obverse. The reverse featured Britannia seated with lighthouse, sea

and rocks. Date in exergue. Reverse and Obverse have beaded or toothed circle.

A new Queen's portrait was adopted in 1874, featuring a more aquiline nose and slightly thickened neck. Further modification resulted in a new portrait beginning 1881 during which year hearaldic coloring was added to Britannia's shield. L.C. WYON appears on truncation of the obverse. The designer's initials L.C. W. appear in incuse below shield. Varieties exist without signature of the designer. Numerous varieties and die-parings exist for mostly all dates. The subject of die varieties is treated exhaustively in C. Wilson Peck's manual of copper, tin and bronze coins. Essential specimens of the period in a comprehensive type-collection, should include the 1860 beaded and toothed rims, the principal combinations of signatures and designer's initials from 1860 and 1861, the new portrait of 1874. H mintmark of 1875 or 1876, the new portrait of 1881 and the same version with H mintmark.

Old Bust (Veil Over Crown) 1895-1901 Copper

CAN ASSESSION OF THE PARTY OF T

3rd Issue Bronze, Veiled Head, 1895 — 1901

New obverse design featuring an aging and truly Victorian prefile of considerable dignity after the model of Thomas Brock, showing a draped and diademed Queen with veil. The dies were engraved by G. W. de Saulles. Reverse design copied with numerous modifications from the L.C. Wyon version. Diameter and weight, identical with the previous (2nd). From this period dates the present Britannia design, characterized by a more erect figure. larger and more oval shield and the omission of the lighthouse and ship.

Two distinct reverses exist for 1895, a design with sea behind Britannia, and the sea missing behind Britannia, both constitute distinct "types" for this issue. Proofs exist for 1895 and 1901.

Valuations: 1895 Missing Sea, Unc. \$25.00 (Referred to as Low Tide in U.S. listings) All other years with Sea

# P.L. Set

(Continued from Page 1) twenty five dollars. While this might have curtailed purchase of the sets by the small collector, it certainly would have presented many advantages.

The five set maximum could have been removed. The price would have prevented any attempt at large scale purchasing.

The sets could have been boxed in suitable presentation cases making them all the more valued and giving added business to the manufacturers of such

The greatly enlarged profit could have been applied to the expenses of running the Mint in general or to the production of other numismatic material.

The higher prices with the removal of the maximum order would have cut down to a bare minimum the paper work involved. Under the present

system the Mint will be buried under the paper work connected with this order for the rest of the year.

The argument against the high price is completely negated by the fact that future prices on the sets are already at the ten dollar level and threaten to go higher when the first sets hit the market. Since many collectors will have to purchase these sets at market prices, they will be paying from ten dollars up for them and dealers will be making profit that could have just as well have been made by the

Finally, a price per set far in above face value of the coins would have greatly limited the number of investors involved in the ordering. Only a collector would be interested in such a purchase; an investor would hesitate to put a large amount into a set of coins with a low minimum recovery value. It must be borne in mind that much attempted investing was done in the 1964 and 1965 sets because of the relatively small difference between issue price and face value. The investors had, in effect, an insurance policy against loss because of

In any event, the most recent in a long series of government blunders in the field of numismatics has now become historical record. It is certainly to be hoped that the U. S

Treasury has been observing this most recent experiment with an eye out toward its future handling of the situation at such time as it goes back into the proof set business. Let

it remember that at any time, no matter how overbought, the numismatic community can throw up fifty million dollars in purchasing power overnight. Let it plan accordingly.

# FACTS YOU SHO

Regarding the 1964 Pointed and Blunt tail 9 Dimes

The Pointed tail 9 is rare, the Blunt tail 9 is common, this is our opinion from a lengthy detailed research. There are less than 2,000,000 Pointed tail 9 1964-P dimes, with over 300,000,000 Blunt tail 9's with the balance of this year and next year this could mean up to 1,000,000,000 yes, one billion, Blunt tail 9 dimes of 1964-P will be available. When you consider the ratio 2,000,000 and 1,000,000,000 you have a rare item.

The 1964-D Pointed tail 9 isn't as rare but only some 47,000,000 are out in comparison to up to 2,000,000,000, yes two billion Blunt tail 9's. The U.S. Mint is out to flood the market! And they will. But the more they make the more rare the Pointed tail 9 dime will be!

The pattern is the same as the 1960 small date cents. They were struck the early part of the year, thereafter all large dates; so be it hereafter all Blunt tail 9 dimes.

The 1964 Proof sets have the same variety, again the Pointed tail 9 is in a strict minority, only 35,000 similar to the 1960 small date proof set mintage. Over 3,000,000 1964 proof sets will be made, thus 2,965,000 will be of the Blunt type!

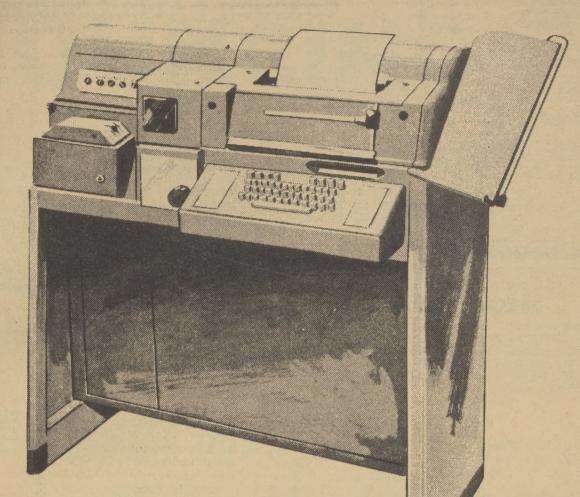

We have a limited supply of this promising dime variety.

231 N. 18th St. East Orange, N.J. USCE introduces the NEW

# BUAL SYSTEM

... The Numismatic Market's First And Only Fully Automatic, Dual System Teletype Network

# **FULLY AUTOMATIC!**

USCE's new "Dual System" is the ultimate in numismatic teletype equipment! NO waiting to get on the line. NO line contention. NO message interference. All messages are sent at maximum speed by punched tape. All you do is place your message tape in the transmitter. No need to wait at the machine . . . you can attend to other matters in the shop. Your message will be picked up by the automatic polling system which polls every station in turn, assuring every member an equal opportunity to use the lines.

# **DOUBLE CAPACITY!**

The all-new model 28 ASR Automatic Tape Machines send and receive SIMULTANEOUSLY. That means that the United States Coin Exchange now has twice the present capacity of any other teletype network. Only the "Dual System" gives you 60 minutes per hour sending time—and 60 minutes per hour receiving time. Simultaneous sending and receiving also means that relays are not interrupted by outgoing messages. Thus messages are received by all stations at approximately the same time... keeping the market current even during the busiest trading hours.

# **NEWLY EXPANDED MARKET!**

USCE offers you the largest teletype market in the numismatic field. The membership of the American Numismatic Exchange will be consolidated with USCE, bringing the number of active, trading members on the one network to OVER 300. Consider the tremendous purchasing and selling resources of this market. Your earnings as a teletype dealer are directly proportional to the quality of your teletype service . . . and the number of dealers on the network. And the USCE "Dual System" can efficiently service over 300 dealers.

#### MEMBERSHIPS NOW AVAILABLE!

The expanded facilities of USCE's new "Dual System" have greatly increased the number of dealers that can be serviced on the exchange. Memberships are now available in most geographical areas at \$280 per month; slightly higher in Canada. For more information on how USCE's ultimate new teletype system can help you increase your business, write or call...

# Cashdan's Coin Comments

## Eliot J. Cashdan

T certainly looks like United States collectors are interested in 'proof sets whether they be U. S. sets or foreign sets. We have heard of the avalanche of orders for the 1965 Canadian proof like sets which were received during the first few days of January. As a matter of fact, many people did not believe the Canadians when they said that they would not accept orders before Januarv 1st. 1965. These peo-

thought that they would be smart and send their orders in a few days earlier and get early delivery on their sets.

We have received in-formation that several hundred thousands of orders which were received early were returned. It also seems that these early orders will be out of luck because the amount of orders received already is the entire capacity of the the Royal Canadian Mint's production of proof like sets for 1965.

Now we don't want to start a riot, but here is an announcement that was just received from Mexico and is appearing for the first time in print in any publication. As many of you know, a new Government was inaugurated in Mexico on December 1st, 1964. It appears that there are some people in the new Government who do not look with disfavor on coin collectors as they do in this country.

At any rate, for the first time in its history, the Republic of Mexico is issuing

SAFES - STRONGBOXES

MODERN fire and theft protection priced from \$18.75 to \$137.50. We pay delivery charges in continental U.S.A. Lay-away, pian available. Write for brochure and details.

proof sets for world wide distribution. These sets will be in presentation cases and will consist of the following coins: 1 peso, 50 centavos, 25 centavos, 20 centavos, 5 centavos, and 1 centavo. They have struck 10,000 sets for 1964, and they inform us that the capacity of the Mexico City Mint for the production of proof sets during 1965 will be approximately 10,000 sets per month, althe production of 1965 sets will be 100,000 sets.

The sets will be 50 pecos (4.00 U.S.) postpaid. There is a limit on the 1964 sets of two sets per order and on the 1965 sets of five (Continued on Page 8)

sets per order. Remittance should be in the form of cashiers check or money order and U.S. funds are okay. They mention that if the 1964 sets are already sold out when your order comes in that your order will be returned to you unless you make a note that you will take 1965 sets instead. They will accept orders for the 1964 and the 1965 sets now, but we suggest that you send in seperate orders for each year to avoid confusion.

Send the order to: Numismatica de Mexico, S. A., Apartado Postal 7392, Mexico. 1, D.F. Mexico. We might add that you should print your name and address plainly as the sets will be mailed from Mexico City directly to you. We have found that when dealing with people who do not speak our language that it is best to print and be very explicit. The 1 peso coin is supposed to be discontinued as far as regular circulation is concerned during 1965, but the coins will be included in all of the proof sets. It seems to us that perhaps

they have some politicians down in Mexico who have been trying to emulate the U. S. variety. Early in 1964 it was announced that the paper 1 peso notes would be discontinued, and they were gradually withdrawn from circulation. The paper 1 peso notes were selling at a premium, especially in uncirculated condition a few months ago. Then all of a sudden it was reversed, and the paper 1 peso notes are back in circulation and the 1 peso coins are going to be discontinued. We have also heard talk about discontinuing the 1 centavo coin, but we have received no announcement on this.

Being that PACE is set up to publish news faster than any other coin publication, we expect that the entire output of 1964 sets will be sold to our readers, as the readers of other publication won't get the news for at least another week or two. It will be interesting to see to what heights the 1964 Mexican sets climb with the limited issue of 10,000 sets. Actually we think they will be very much in demand because there are many serious collectors of Mexican coins in the United

States. In our opinion, these sets should be more desirable than the sets of many foreign countries such as Sierra Leone and South Africa because it is possible to follow through and collect other coins of Mexico without going to any great expense.

We have noticed that the proof set market on U.S. and Canadian 1964 sets has had quite an increase since the first of the year. It is hard to say how long the prices will keep in-creasing, but we expect that they should level off soon when the complete mintage figures for 1964 are available. Of course if there is an increasing demand for the 1964 sets the prices will continue to rise until they reach a figure where the demand will slack off. Next week we will bring you the report of the first major convention of 1965, the F.U.N. Convention held at the Deauville Hotel in Miami, Fla. January 6th through 10th which we are attend-

# Collecting?

(Continued from Page 3 )

Unc..... \$5 to \$6 Official and Private Patterns

No survey of Victoria's pennies is complete with-

out a reference to the numerous patterns produced during the period. Two categories distinctly emerge: Official patterns, largely composed of decimal designs in bronze, the 1859 or undated copper-nickel trials and general patterns for pennies, half pennies and farthings.

Private patterns abound, of particular interest are Smith's decimal patterns, by Marrian & Gausby in 1846. Moore's patterns and the pattern pennies, half pennies and farthings of German origin of 1860 and 1887. Aluminum first appears in pattern coinage during this period.

Conclusion The field of Victorian pennies remains widely accessible and constitutes a subject of challenging study and mental stimulation. Copper and bronze coins of this period are reasonably priced and could provide an excellent vehicle for long-term appreciation coupled with low risk. This market is likely to be favorably affected by the expansion of interest in the Victorian era as a whole. Three major works of high quality on Queen Victoria are scheduled for release in 1965 and 1966 and should provide added impetus to an already popular period of British history.

# CONGRATULATIONS

# MIDAS COIN CENTERS OF AMERICA, INC.

on the opening of

another MIDAS Coin Center

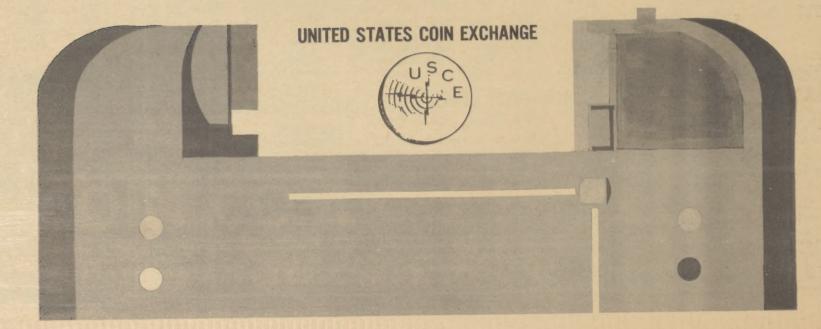

at

4314 East 31st Street TULSA, OKLAHOMA

Like most people in the exciting world of coins, we at United States Coin Exchange have been watching with interest the growth of Midas Coin Centers of America, Inc., 111 South Bemiston, Clayton, Missouri. We watched the formation of the franchising organization, the appointment of Area Franchise Directors and now the opening of another Midas Coin Center in Tulsa, Oklahoma.

We feel the opening of these Midas Coin Centers across the country will bring professionalism to the coin world. Already Midas has instituted many features such as standardized Bid Board Auctions, and a 90-day credit plan with immediate delivery of coins. Midas has brought to coin collectors modern merchandising methods, a bright, cheerful atmosphere and service by knowledgeable people. Our teletype service will be installed in all Associate Midas Coin Centers to provide the latest, up-to-the-minute quotations for buying and selling. Midas has introduced new security measures in these centers for protection of coins and many employee benefits never before available in this field. This professionalism has long been needed in our industry.

Congratulations to Midas Coin Centers of America, Inc., on a "job well done" and best wishes for future growth and expansion.

# J&B COIN CO. IS MR. BUFFALO

WE ARE ONE OF THE LARGEST BUFFALO DEALERS IN THE COUNTRY . . THE ONLY DEALER THAT DELIVERS OVER 95%

# **Space City Averages:**

#### How They Are Obtained

With close to 1,500 separate statistics appearing each week in PACE, a need exists to express this information in graphic form for busy readers.

We are currently charting eight different coin series each week as you see below. These charts are based on Space City Averages, an arbitrarily chosen group of rolls which we feel are representative of the total for that series.

To be included in the Space City Averages rolls are chosen on the basis of three factors: (1) their trading is constant, (2) they are widely held, and (3) they are indicative of the It is obvious infrequently traded items, closely held items, and extremes in the series would not serve this purpose.

this purpose.

Each week the statistical staff of PACE prepares these averages from the information obtained on The American Numismatics Exchange transactions.

The amount expressed in the Space City averages is the total market bid prices for the rolls included in the averages. This is a dollar figure and is compared with previous week, month, and year figures for analysis.

month, and year figures for analysis.

The high and low for 1964 is also

The following BU rolls were used in the calculation of the Washington quarter averages: 1946-D, 1946-S, 1947-D, 1947-S, 1949-D, 1950-S, 1951-S, 1953-P, 1953-S, 1954-P.

# MARKET SUMMARY

# **January 6, 1965**

By Russell Brown

Interest in proof sets and proof like sets overshadowed the market this week and as a result, most non proof issues took a back seat. Lincoln cents and dimes were in slight demand but Jefferson nickels and Franklin half dollars simulated their year end performance by scoring series wide losses.

The early cutoff of the 1965 Canadian proof like set orders acted as a shot in the arm for the entire proof market and both the U. S. and Canadian issues were in advance. The Canadian 1964 sets rose \$1.50 in heavy trading and the U.S. sets advanced across the board. Largest U.S. gainer was the 1964 set with an increase in bid price of \$2.25. Most other U.S. issues advanced slightly. There were no declines in the series.

Lincoln cents were requested and no one issue was overly popular with the exception of the 1960 small dates. Both of these issues showed good increases with the Philly variety scoring a gain of \$20 and the Denver a gain of \$.75. Advances outnumbered declines by a two to one margin.

Dimes staged a recovery from their year end lows and five issues rose three dollars or more in price. The 1955-P,D, and S group all advanced and since these issues usually lead the dime market, it appears that the dime decline period is over. The 1951-P dime was heavily demanded and rose \$\frac{10}{210}\$

Quarters and dollars were, in general, unchanged in price on average. Most major quarter price

movement took place within issues of the forties. While some of the changes were fairly large, the series was mixed in activity with advances equalling declines. The largest gain was registered by the 1941-P while the big loser was the 1942-P.

Morgan dollars were quiet with some of the junk issues scoring small increases. Largest gain was in the five dollar range by the 1891-O. The only loss in the series was marked up by the 1902-P.

Peace dollars were typically inactive with several large price changes marring the quiet. The 1924-S and 1935-S gained \$50 and \$25 while the 1935-P and 1927-S lost \$20 and \$50. All other issues remained at late 1964 price levels.

Jefferson nickels took another beating with general disinterest showing throughout the entire series. Only the 1938-P and S met with favor. Eighteen other issues lost amounts ranging up to \$15. The 1950-D was heavily traded at last week's prices. In fact the ask price on the 50-D seemed to edge somewhat lower toward the end of the week.

Franklin half dollars dropped steadily lower and the averages were hard hit as the 1949-P and S, both of which are used in the averages, declined \$25 each. The 1949-D and 1950-P also dropped eight and ten dollars respectively. Strangely enough, the two keys, 1953-P and 1955-P reversed the general series trend and gained slightly. And the late date Philly rolls were in demand and scored slight gains.

#### The Market Opinion

Anyone who doubted the ability of the numismatic community to come up with additional buying power when presented with a bargain should have been in the receiving room of the Canadian mint on the first of January. It will probably take them a month to dig out of the avalanche of mail received.

It appears that the numismatic investor is getting more and more selective in his buying. No more is he trooping down to the corner coin store and picking up six of this and a half dozen of that with no aim or plan in his purchasing. But the most important point is that he will still buy if given a good opportunity to make a profitable purchase.

The price of gold which was mentioned several weeks ago has sagged slightly as a result of a general year end money shortage. Also, most investing purchasers seem to feel that the government may well keep away from devaluation for some time to come and as a result the price of gold will not rise in the short term.

It is quite interesting to note that the various programs before Congress which are to relieve the coin and silver shortage may make hoarding of B.U. silver bags either very good investments or very poor ones. If any of the plans to double the value of silver go into effect, the hoarders will get rich. However if the government reduces or removes the silver content from coins and continues to control the price at \$1.29, the investors are not going to show much gain. And be sure to remember that Congress can make it illegal to melt coins which will real. ly throw a monkey wrench into the plans of the hoarders.

Using Coins Listed In Space City Averages

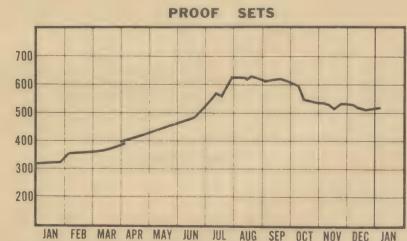

The following BU rolls were used in the calculation of the Franklin half dollar averages: 1948-P, 1948-D, 1949-P, 1949-D, 1949-S, 1950-P, 1950-D, 1952-S, 1953-S, 1954-S, 1956-P, 1957-P, 1958-P, 1959-P, 1960-P.

The following BU rolls were used in the calculation of the Peace dollar averages: 1922-S, 1923-D, 1926-P, 1926-D, 1926-S, 1928-S, 1934-D.

The following BU rolls were used in the calculation of the Morgan dollar averages: 1878-CC, 1879-O, 1882-CC, 1883-CC, 1883-S, 1885-S, 1890-O, 1894-O, 1897-P, 1897-O, 1897-S, 1898-P, 1901-P.

All proof sets from 1950 to date, excluding the 1960 small date set, go to make up the proof set averages. The current year's set is added to the average on April first.

# American Numismatics Exchange Transactions

BU Roll Prices as of Wednesday, Jan. 6, 1965

These bid and asked prices, from the American Numismatic Exchange Inc., do not neces-sarily represent actual transactions. They are a guide to the range within which these coins could

have been sold (indicated by the "bid") or bought (indicated by the "asked") at the time of compilation. Price changes are obtained by com-parison of weekly bid prices.

Prices are wholesale quotations compiled from the American Numismatic Exchange teletype system which serves 195 coin dealers across the country.

# 1965 B. U. CANADIAN COINAGE

Canadian coinage for 1965 promises to be the best yet. The obverse of all ccins has been changed and now portrays a more mature image of Queen Elizabeth. We have seen Canadian coinage become scarce and prices rise in the years 1963 and 1964. We suggest that you order now while our prices are low Again we offer our Layaway Plan for easy financing.

WHY ORDER FROM THE DOWDS?

As the largest Canadian dealers in the States, we offer you a stock that is located in the States. When you order from us, there is no prolonged period of waiting for your merchandise to clear Customs, therefore no Customs fees. Also you do not have to take the risk of having your mint sealed bag opened at the borders.

In the long run it is cheaper and safer to become another one of the Dowds' satisfied clients.

Canadians please note our Canadian address. When shipto our Canadian customers, we ship either Parcel Post Rail Express from Montreal, again avoiding Customs.

# UNDERPRICED!

We Recommend for Immediate Purchase.

# 1957 and 1958 CANADIAN BU NICKELS

Compare Canadian BU Nickel Rolls

Mintage	
DATE In Millions	Price
1953 17	\$225.00
1954 7	500.00
1955 5	245.00
1956 9	135.00
1957 7	120.00
1958 7	110.00

- The 1957 and 1958 nickels are lower in mintage than the 1953 and 1956 nickels which are much higher in price.
- The 1957 and 1958 nickels at this moment according to their mintages have the price potential of \$500.00 per roll. (The 1954 nickel roll with the same mintage of 7 Million sells for \$500.00)
- The 1957 and 1958 nickels are extremely common in circulated condition. (We estimate better than 98% of each date is in circulation), which would leave only 2% or 140,000 coins of each in Uncirculated condition.
- The 1957 and 1958 nickels are extremely scarce in Uncirculated condition and the demand is much greater than the available supply.
- The 1957 and 1958 nickels along with the 1954 nickels will be the key dates in the first Queen Elizabeth series and this series will be completed in 1964. (A new design with a more mature portrait of Queen Elizabeth will be minted in 1965). When the U.S. Franklin Half Dollar series was completed in 1963 the 1955 Franklin Half Dollar soared from \$25.00 per roll to its present price of \$175.00 per roll.

The 1957 and 1958 nickels in our opinion will sell for at east \$500.00 and \$450.00 per roll within three years.

We offer CHOICE Brilliant Uncirculated rolls of 1957 Canadian nickels at \$120.00 per roll and CHOICE Brilliant Uncirculated rolls of 1958 Canadian nickels at \$110.00 per roll. All rolls shipped in Tomken tubes (postpaid and insured).
